

RUN 2316
SUNNYBANK HOTEL
HARES ; LUFTWAFFE & MULTIPLE CHOICE

With the wind coming straight off the West Pole , which must have been just outside the carpark judging by the temperature, the smallish pack was put on notice by the Hares' instructions : Trail is marked on the left , the right , the road, the footpath and not necessarily in that order and anywhere else it would be inconceivable to imagine self-respecting hounds would find it . So it was !!

Footpath to roadway to opposite footpath back to opposite side of the road . Half the running time was spent FINDING the trail not FOLLOWING it

Future Hares please note : The running pack is small and it is impossible to maintain a sufficient spread to cover all options . Consistency is the name of the game . Trail markings on this and some recent runs were not consistent with the Hash Bible . FT (false trail) is used after a 1, 2,3,4-way or 360 check to indicate the False Trail from these checks . DO NOT confuse CB (check back) with FT. CB is used to turn the pack back to the last street , track , easement intersection from which the pack has to locate the trail . This run ran out of incorrect confusing combinations with FTs that should have been CBs and vice versa .

The Circle was reasonably short and sweet , temperature problems.

SOTW was somebody , c.r.a.f.t (no I dont mean CRAFT)

PointsVenue 8/10

Trail1/10 (your Kids' play chalk doesn't do the job)
