

As a Hash club approaches its 50th year it is deemed advisable to have an audit to assess its standing in the hash community and to support it into the projected next 50 years.

Any comments arising from this audit will be disregarded

HHH Quality Assurance Services

Audit of Brisbane Hash House Harriers (Men Only) Club

Date of Audit 30 October 2017

Subject of audit: Run 2489 Hares: Vaso/Grewsome

Activity	Risk	Outcome
Choice of venue		
International Hotel Spring Hill	Limited parking available at hotel	Double and triple parking by hashmen to avoid street parking fines
Safety of gathering location		
By 6:15pm 33 hashmen gathered in carpark	Blocking of through traffic	Numerous cars needed to slow down or gesticulated to clear hashmen from driveway
	Pissing off of shoppers at liquor barn	Customers likely to complain to barn staff about access. Hotel management likely to restrict hash activities at site in future
Theme run participation	No lolly treats may result in poor interest in this theme run	One brave hashman wore a Halloween mask and received deserved tricks
Information sharing before run	Hare and co-hare might understate the undulating terrain and the possibility of completing the course in 60 minutes	Poorly informed hashmen may lose trail and not complete planned exercise
Trail marking	Insufficient or inconsistent trail markings could cause distress amongst runners and walkers	Runners broke into at least four groups and walkers probably more due to poor pre-run information and trail marking
	Undulating terrain could create a disconnect in communication between runners	Runners in four or five groups meant that calling OnOn or checking became pointless
	Unclear trail markings at two ways or 150 metre long checks could create confusion amongst runners	A 150 metre check created a two kilometre gap between groups of runners
Run trail set near to public facilities like motorways and golf courses	Security fencing around public facilities may prevent a smooth flow of intended run	Three runners risk serious injury and castration in climbing not one but two 8

	trail	foot chain wire fences
Run activity not to exceed 60 minutes and or 8 kilometres	Runners and walkers might not arrive in time for circle activities	Long delays in the arrival of pack can cause ice to thaw and therefore beer to warm
	Brewmaster lost on trail	Most serious of outcomes if beer not available to hashmen. Backup brewmaster fortunately available to offer service
Monk not available to punish sinners	Miscreants avoid punishment and become repeat offenders	Pre-loved Monk carried out Monk duties taking revenge for offences occurring outside the hash domain
Charges from the floor	Events arising from 20 year old dalliances with air hostesses	SOTW shirt to hashman embarrassed about youthful indisgressions
Planned meals for hash pack	Plans with hotel restaurants may come unstuck	Pizza oven unoperational back-up deal results in better alcohol to carbohydrate ratio
Treatment of visiting hashmen	Ignoring visitors may result in no return visits or poor audit outcome	The Penguin veteran of 3000 runs impressed with BH3 social skills but not so with trail marking skills
