

## Run Report Jindalee Shopping Village-Hares JC and Tweety-4 June 2018

Virgin territory-don't think we have ever run this side of the motorway at Jindalee. Took a while for runners to get there , mostly northside hashers who copped the freeway traffic down Centenary Highway. Nevertheless, a good turnout.The run took off in the direction of the river and soon wound its way to the riverfront where a series of clever loops brought runners back to the scenic views of Brisbane River. After running through the dogpark and entering the Jindalee boat ramp, the trail continued into bush alongside the river. Optus and Bugs were leading the way with XXXXin tow. An extremely clever checkback by the hares caught all runners to be faced with a big hike up Mt Ommaney Drive to the top of the Mt Ommaney ridge.

The trail then exited towards the river again along a boardwalk only to be met by another extremely clever checkback. The trail then entered into the labyrinth of curvy streets and culdesacs as we ran into the bowels of Mt Ommaney-=this was impossible to shortcut and runners had to stick to the trail set by the extremely clever hares. Soon, we stumbled onto the walkers trail but still a long way from home. The trail markings were exceptional and the runners easily found their way home from here.

The runners and walkers came in pretty close making it another tick for the clever hares.

The on on was no exception with copious amounts of beer and red wine supplied by the hares at ridiculously low prices-food was exceptional and service was great.

All in all, a top run and definitely the run of the year

Run 10 Onon 10
