

## **BH20 Run No1 - 01 June 2020**

**Hare : Snappy Tom**

**Venue : Kalinga Park (Park Road entrance)**

Thanks to our illustrious Premier, groups of 20 were allowable from midday on Monday. We had just that number so all was above board. There was plenty of parking – just ask Meatlover as he went to all car parks before finding the correct one. A few hashmen had come out of isolation – Brengun, Barebum and Shitbags come to mind. Tinkerbelle was sporting some facial hair grown during isolation much to the intrigue of JC who commented about the change in colour from side to front.

On the dot of 5.00pm CovidGM Mortein called us all to order and sent us on our way. We had soon spread out so the 1.5 metre distancing was not an issue. The walking trail followed the layout set out by Snappy ie walking path to Shaw Road, across the road and another walking path to Pfingst Road, then left on another walking path to the Kedron Brook walkway. The only two runners spotted were Bugs and Tinkerbelle who made an appearance along the way. We crossed Shaw Road again then the only bit of street walking trail to the start. It was a good walking trail Snappy. The only obstacle to look out for was bicycles and a few cars – important for we half deaf aging walkers busily talking the whole way around.

I was one of the last in but had no trouble finding the pergola in the dark – just follow the noise. Thanks once again to Boxa for providing drinks out of empty can sales. The back of his vehicle was chockers with empty can donations. As we inevitably approach the time when we have a combination of set and fixed runs this is a great fixed run venue and layout.
